Review V3

https://smartenergypayment.com/
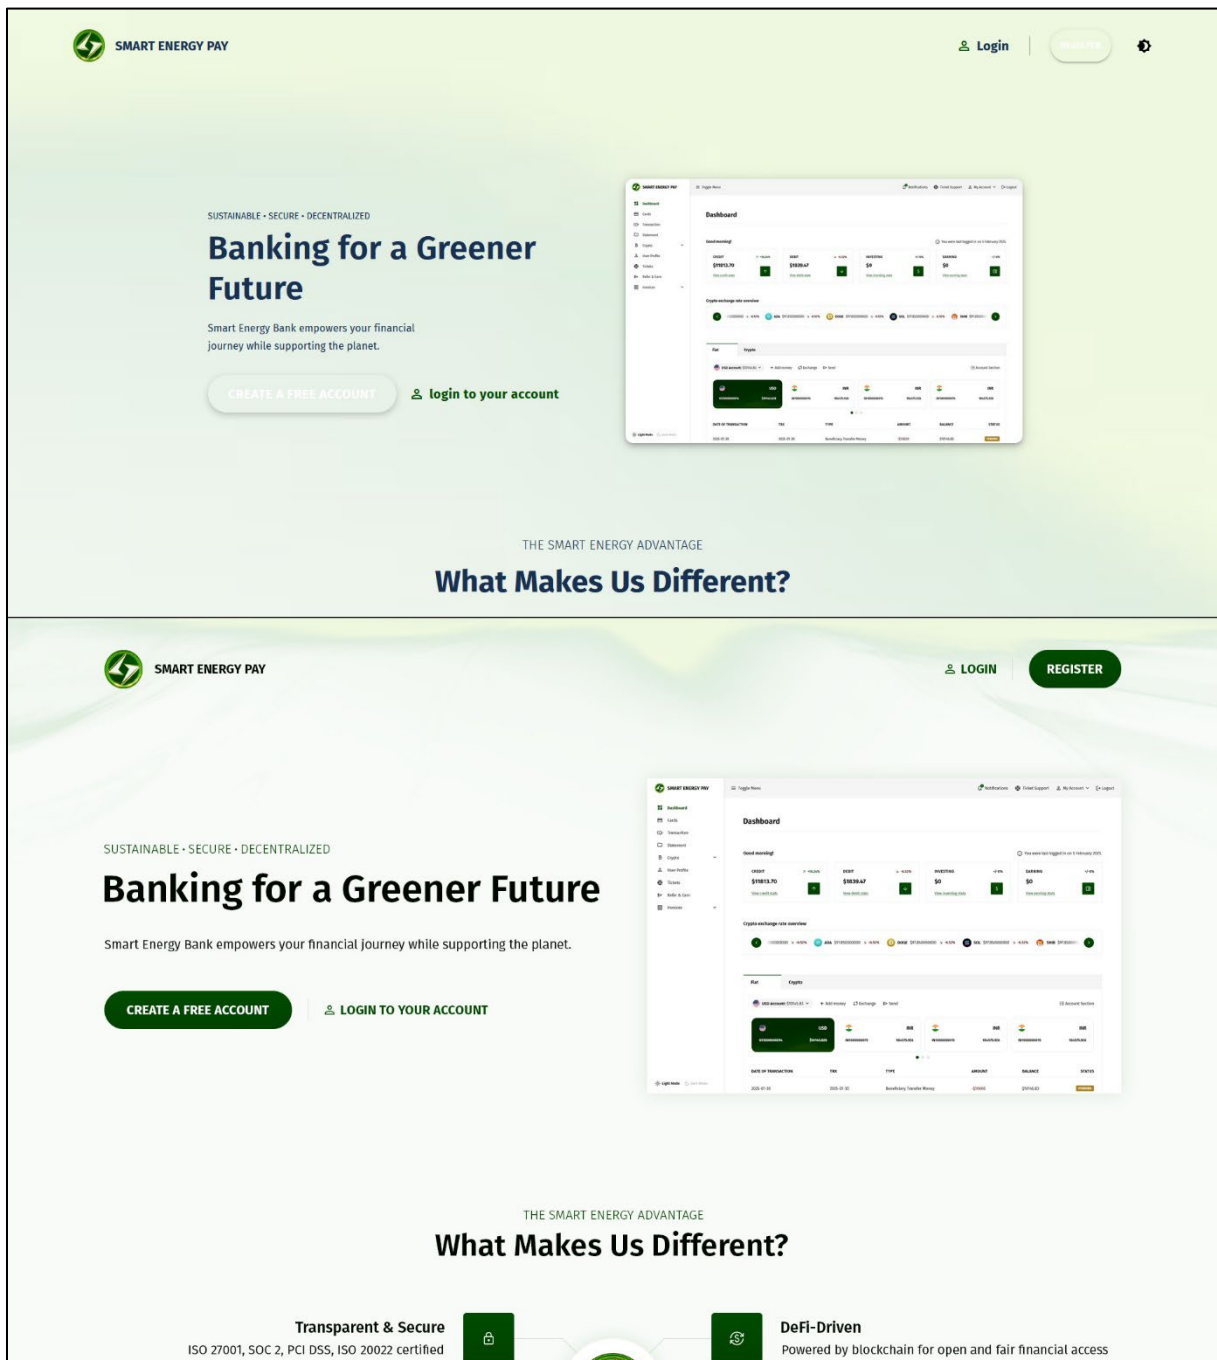

On the one hand there's a css conflict (!important is overwriting font color, family, size, etc), on the other hand almost <u>ALL</u> css values need to be checked **(COMPARE WITH ZEPLIN FILES!!!!!!!!!):**

Container: max-width of 1598px (header & footer too!!!)

Header: Container width (!!!), body background-image not covered position top set correct background color, logo size, link & button color font-size box-shadow text-transform, color of border, darkmode can be removed (for now), Logo needs to be clickable (important for other subpages)

Hero: Container width (!!!), font-sizes, font-family, font-weight, line-height, margins, colors, buttons & links, image size box-shadow border-radius

Advantages: Container width (!!!), font-sizes, font-family, font-weight, line-height, margins, colors

Mission: Container width (!!!), font-sizes, font-family, font-weight, line-height, margins, colors, icon with gradient background, image size box-shadow border-radius background white

How it works: Container width (!!!), font-sizes, font-family, font-weight, line-height, margins, colors, Numbers should not be an image (!!!!!!)

Features: Container width (!!!), font-sizes, font-family, font-weight, line-height, margins, colors, image size box-shadow

App: Container width (!!!), font-sizes, font-family, font-weight, margins, line-height, colors, buttons & links, image size, icon with gradient background

Get started: Container width (!!!), background image, font-sizes, line-height, font-family, font-weight, margins, colors, buttons & links

Footer: Container width (!!!), spacing, background image, missing border, font-sizes, font-family, font-weight, line-height, margins, colors, social icons background gradient

Wrong image alt-attributes (fe. „Dashboard Preview" several times)

Headline HTML Markup is totally wrong (startring with <h4>, then <h5>, then <h3>, …), needs to be:

<h1> Banking for a Greener Future

        <h2> What Makes Us Different?

                <h3> Transparent & Secure

                <h3> Eco-Focused

\<h3\> DeFi-Driven

\<h3\> Global Banking

\<h2\> Bridging Finance & Sustainability

\<h3\>Accelerate the shift to clean energy

\<h3\> Empower individuals through financial transparency

\<h3\> Build a global community for green finance

\<h2\> How It Works

\<h3\> Create Your Account

\<h3\> Choose Your Financial Path

\<h3\> Support Clean Energy

\<h3\> Manage Everything on the Go

\<h2\> Advanced Features

\<h3\> Multi-Currency Accounts

\<h3\> Instant Payments

\<h3\> Virtual & Plastic Cards

\<h3\> Currency Exchange

\<h3\> Smart Invoicing

\<h3\> Eco-Investment Tools

\<h2\> Mobile App Experience

\<h3\> Real-time payment notifications

…

\<h2\> Start accepting crypto payments in just 15 mins

Footer headlines should be only \<strong\>

Responsive Beahviour:

Responsiveness is a really big problem 🙁 it should never happen that elements are overlapping each other, that they are not visible anymore, that icons are stretched, images upscaled, …
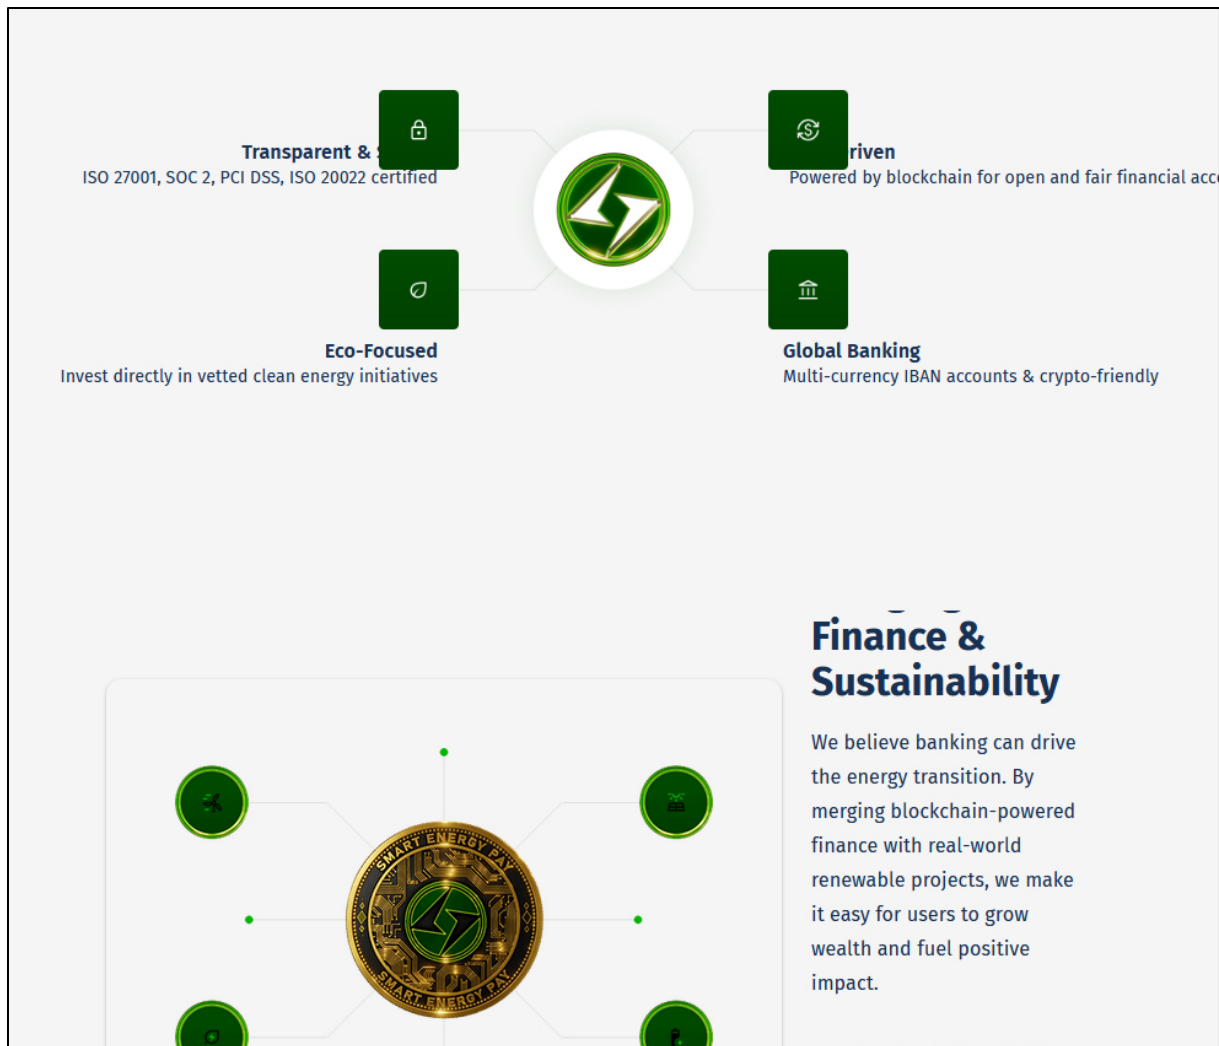

PLEASE change the window size of the browser, the page needs to look good everytime !!!

PLEASE PLEASE PLEASE compare your work with the zeplin project. Wrong font-sizes and weights, different letter spacing, text-transform, margins, image sizes, etc… On mobile devices the headlines have a strange behaviour („What makes us different" is much bigger than the rest), elements are outside of the container, single words are in a new line (without a need, you've setted the max-width to 90% or a strange margin), elements are not properly aligned (fe mobile app image with not needed right margin), etc

The hamburger icon should have the same behaviour as the mobile menu in the user area (slide from the right, full height, same font-size, etc)

https://smartenergypayment.com/myapp/web

https://smartenergypayment.com/register

https://smartenergypayment.com/forgot-password

I don't receive any emails 🙁 (registration, forget password)

Please check my previous reviews and compare with the zeplin file!!!

The logo should be linked to homepage, box without border-radius, placeholder should move to label position on focus (see registration page), checkbox is not styled, forget password link has wrong color, button text is not correctly aligned, copyright footer is overlapping, error mesages have different styling, etc
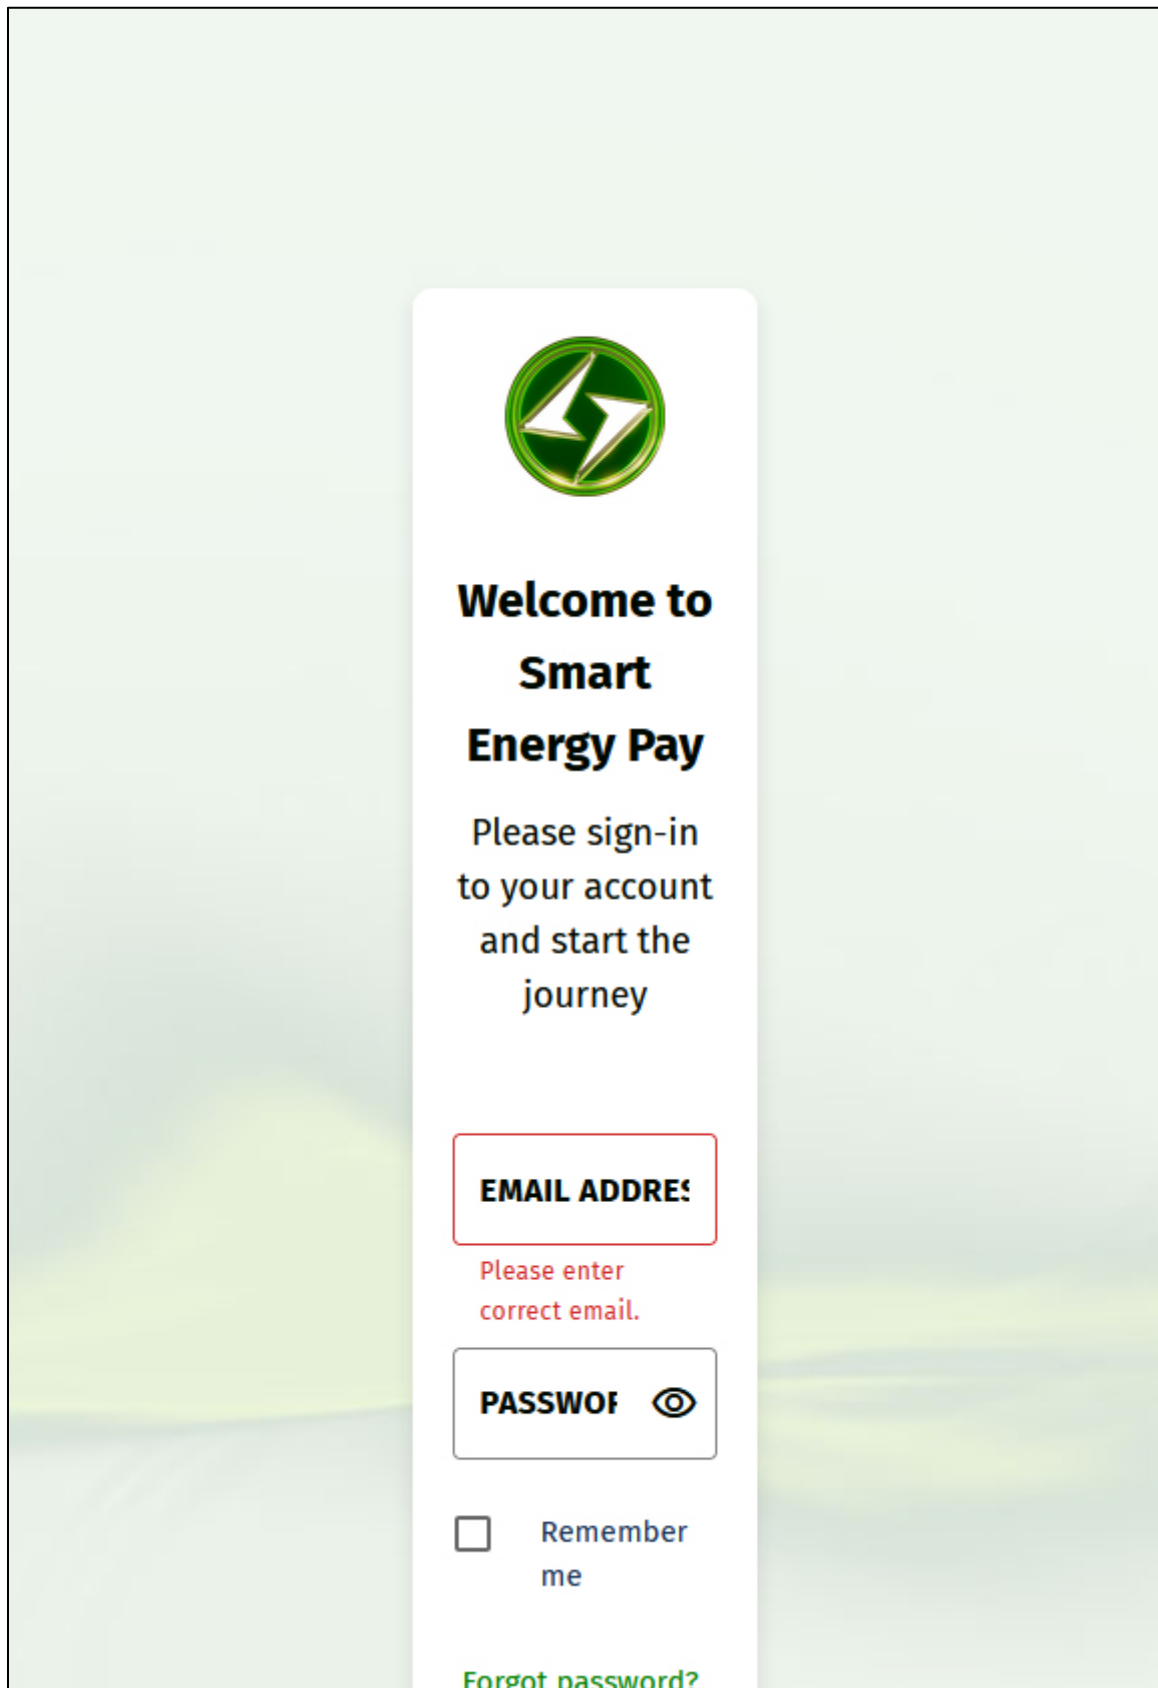

I need to click „Forgot password?" (login page) and „Remember your password?" (forgot password page) twice to go to the other page (caused by error message?)

Registration page with wrong colors (inputs, input focus, „already have an account?"), font-weights, font-size, text-transform, spacing to text, country select needs to have same distance and width like inputs

Forgot password page has a different design (→ should be same like login), the button is not visible

Responsiveness is a big problem on ALL pages (+ copyright footer is not visible anymore):

Sign in instead

+ Toastify Messages still have the wrong background color

https://smartenergypayment.com/privacy-policy

Compare with Zeplin File!!!

Remove color !important

Remove inline styles like margin-bottom for list elements

Wrong Headline structure: <h1> Privay Policy → <h2> Personal Information Protection Principles …

Container should have a max width of 1190px

Spacing to header

Headline with wrong font-size

PDF Download: font-weight bold, icon shouldn't be underlined on hover

List elements without left padding and green circle

„Transferring of Personal Information" and „Information about Cookies" need to be <h3> (Styling: see Zeplin)

„Use of cookies"-List: line-height?! Caused by <span>? unneeded

Spacing to footer, strange background

https://smartenergypayment.com/home

Don't you read our previous reviews? Don't you check your submits? A lot of stuff is still ugly and not functional (I'm testing in private mode):
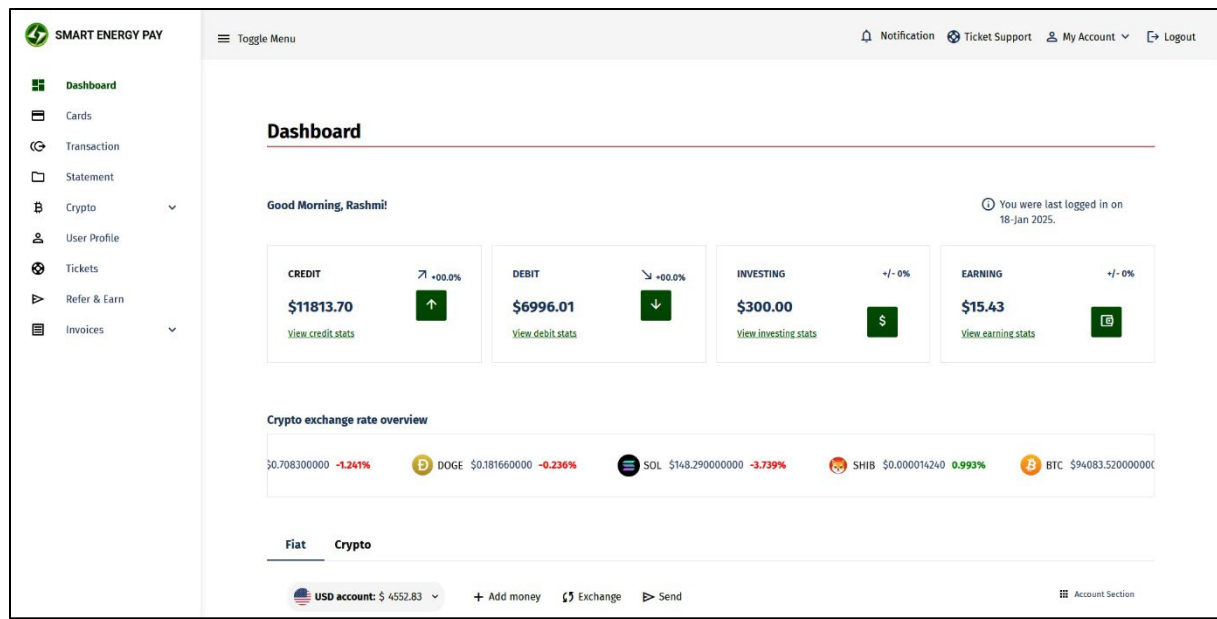

Dashboard: main content with more than 80px padding,
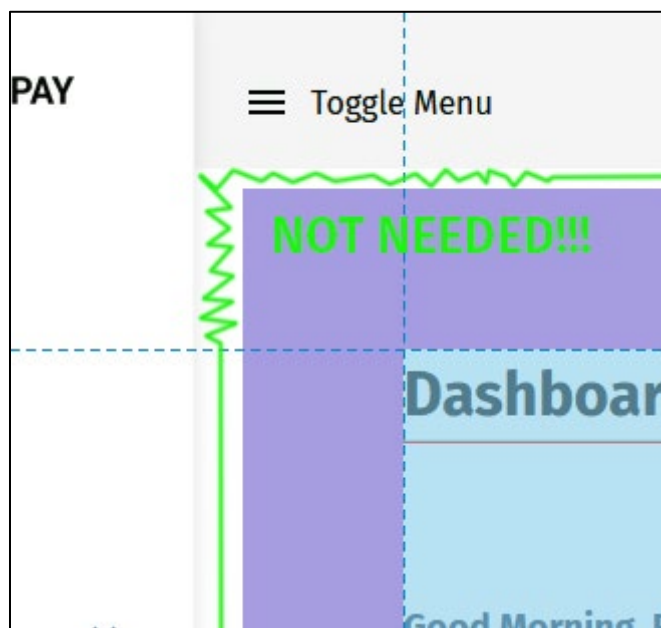

Wrong toastify-background, header links are not correctly aligned(still with tooltip), „You were last logged…" in two lines, „Dashboard"-headline still with red border and wrong spacing (Headline is jumping when i switch to an other page), wrong colors (!important), „Account section" not clickable, „USD account: $ 4552.83" not clickable (only chevron), popus still without background blur and wrong background color, cards with wrong width and (cropped) navigation, wrong tabs, … → **COMPARE WITH ZEPLIN AND CHECK PREVIOUS REVIEWS**

Still not optimzed for big screens (see previous reviews) and mobile devices, some examples:
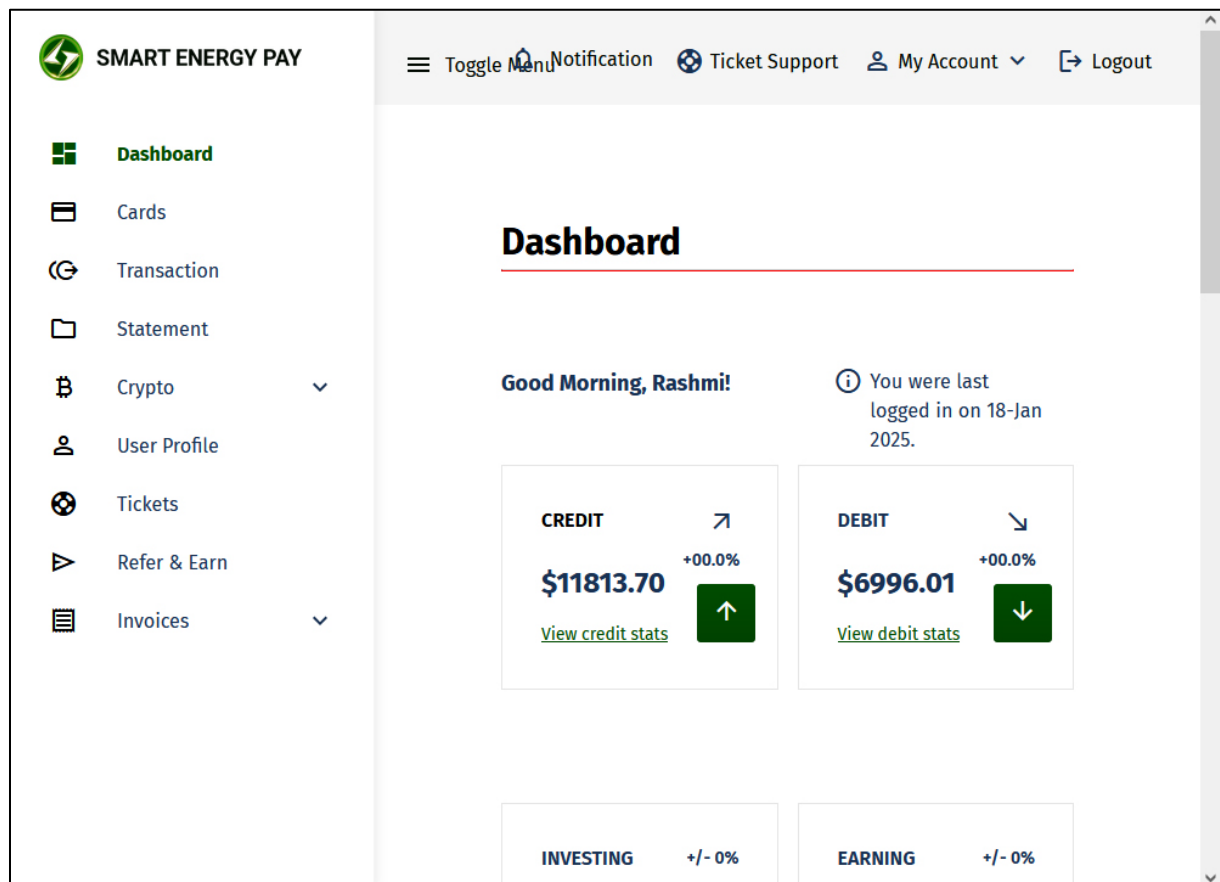

Overlapping Elements
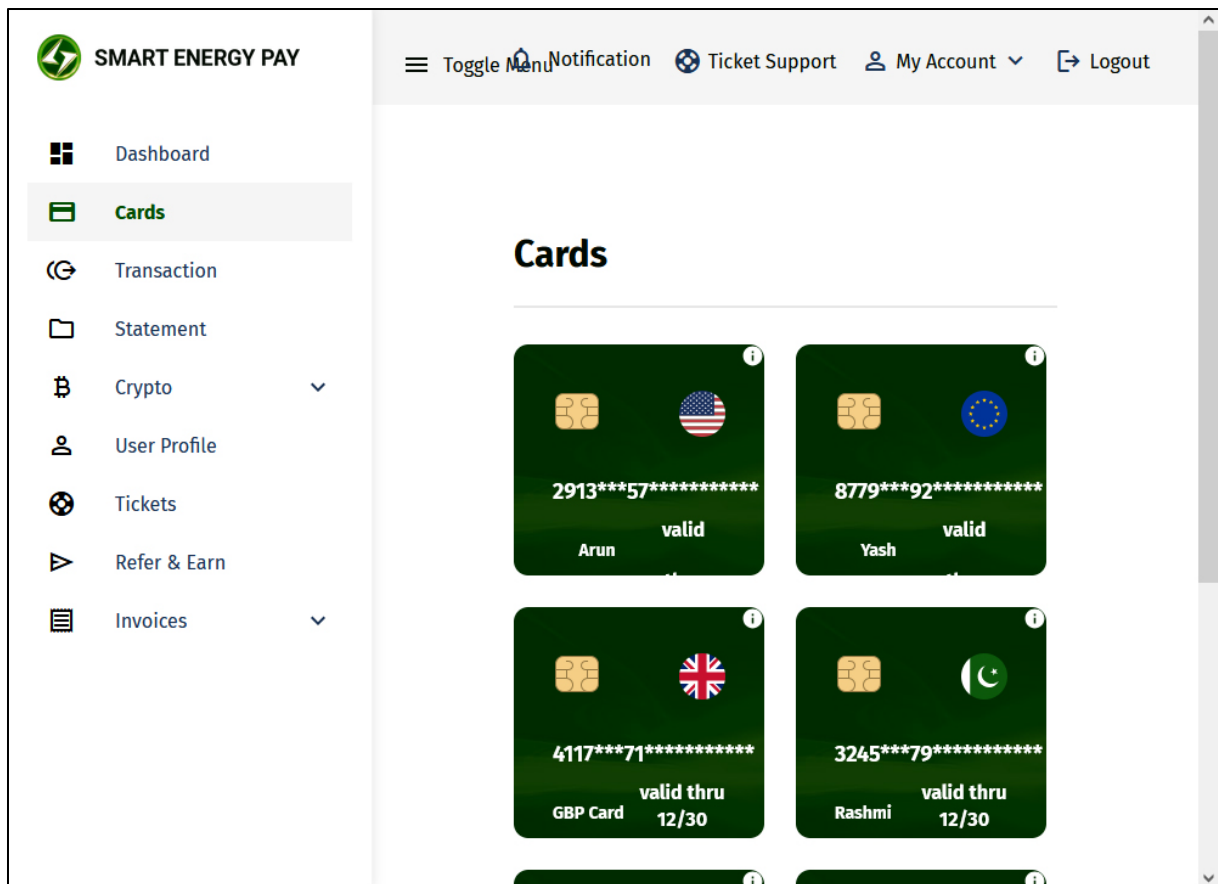

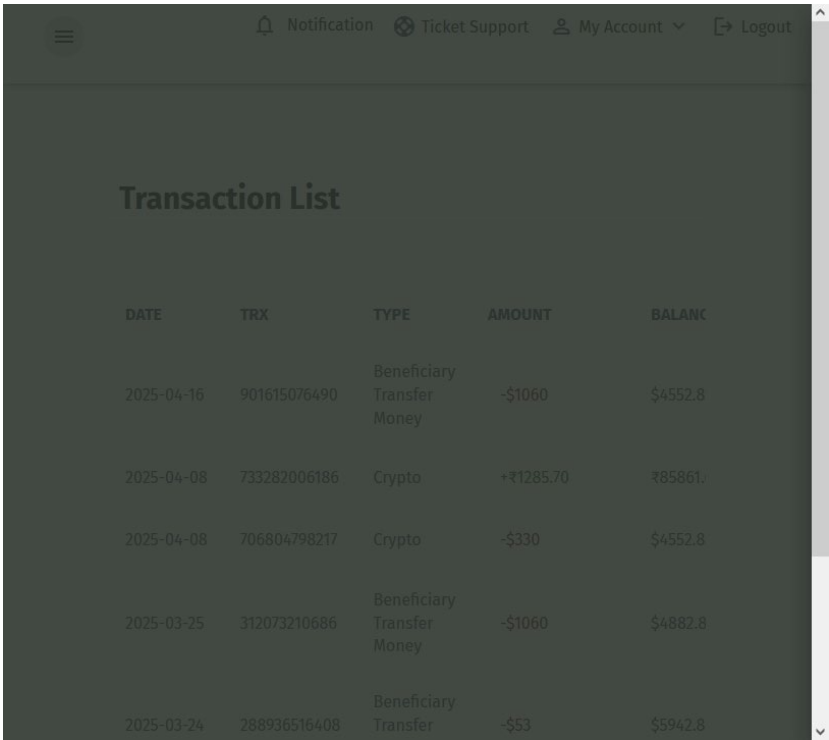

„valid thru" not visible
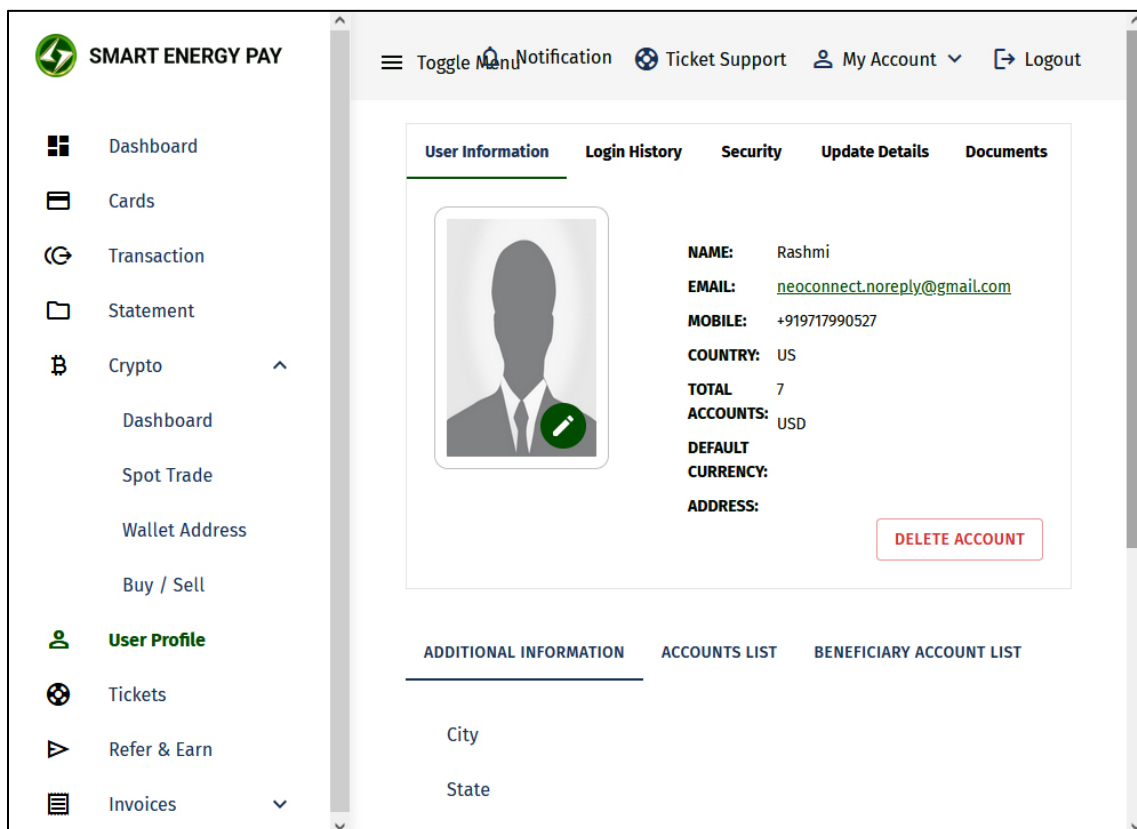

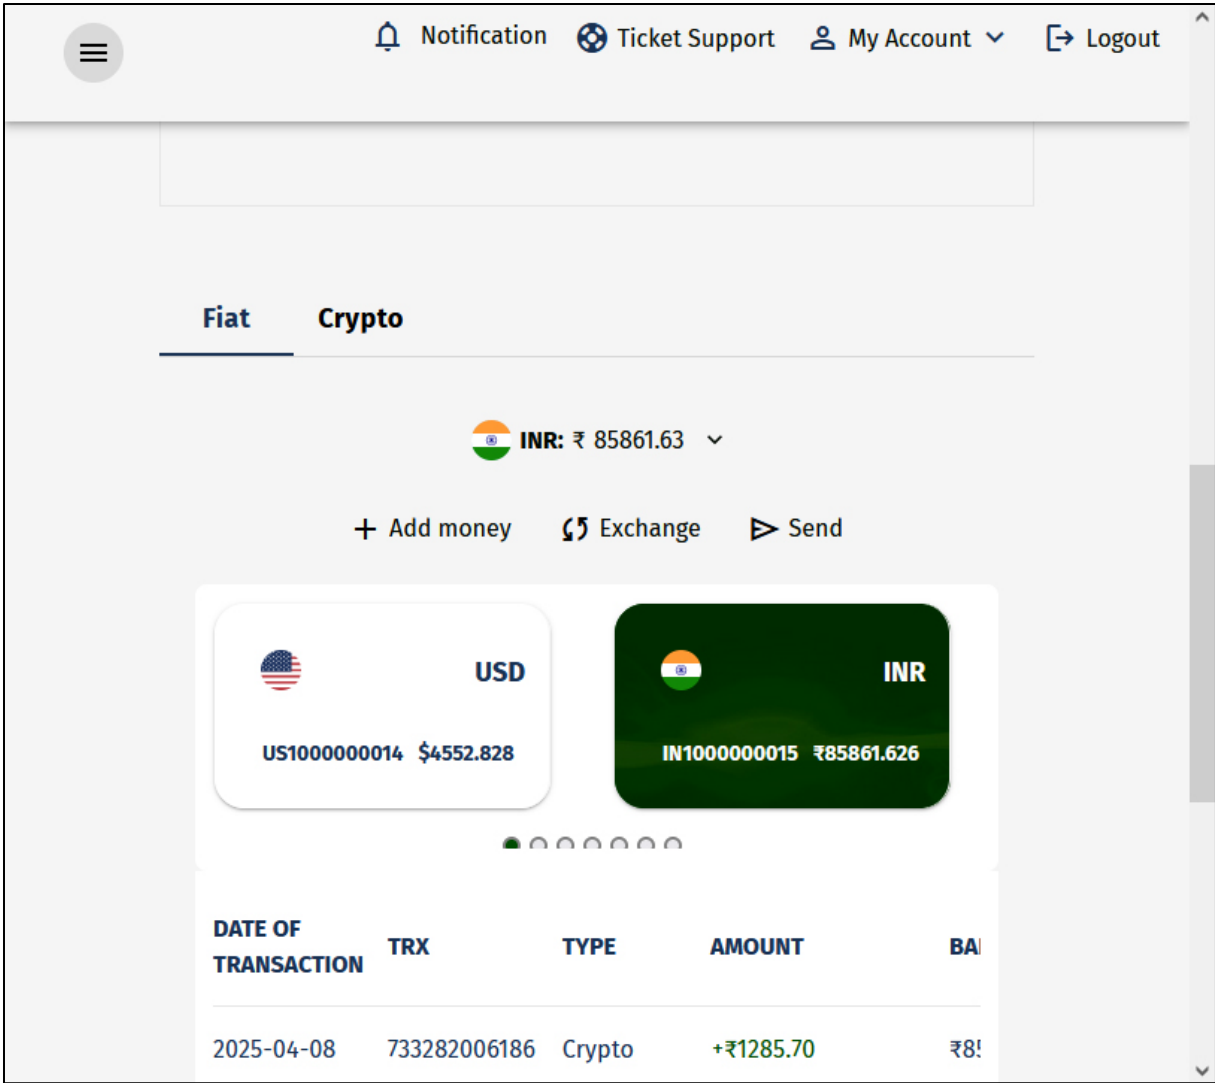

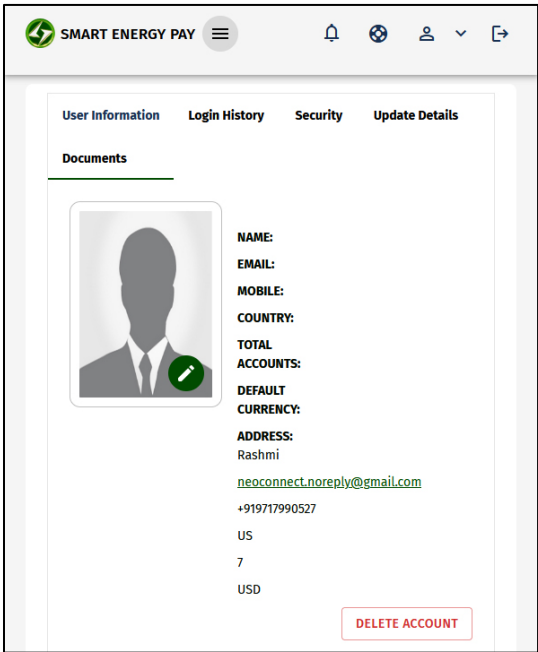

Stretched image
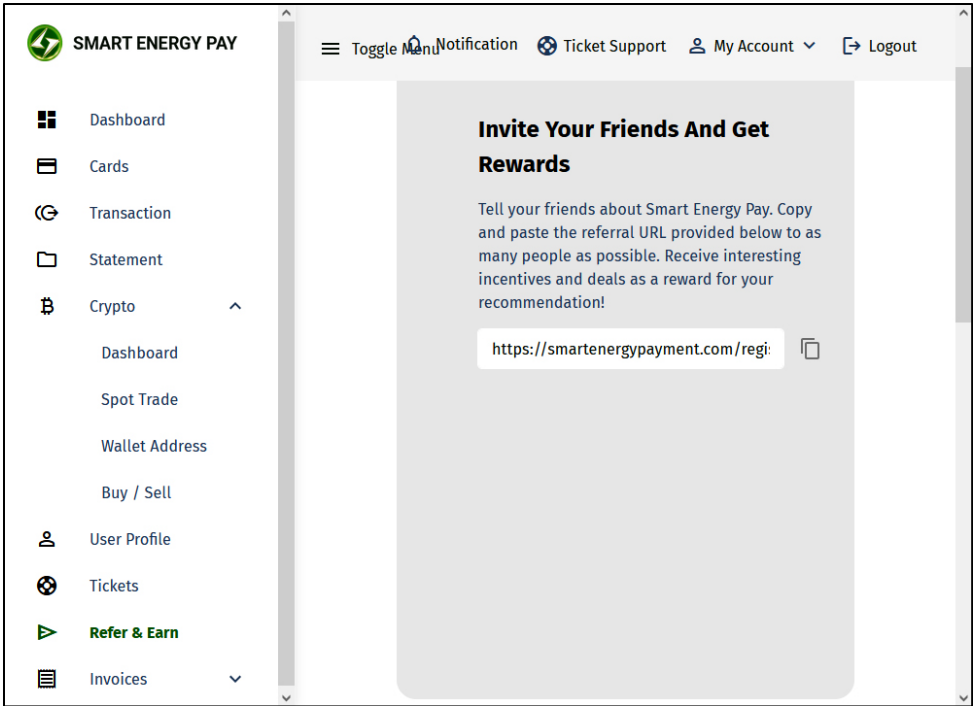

Missing Image
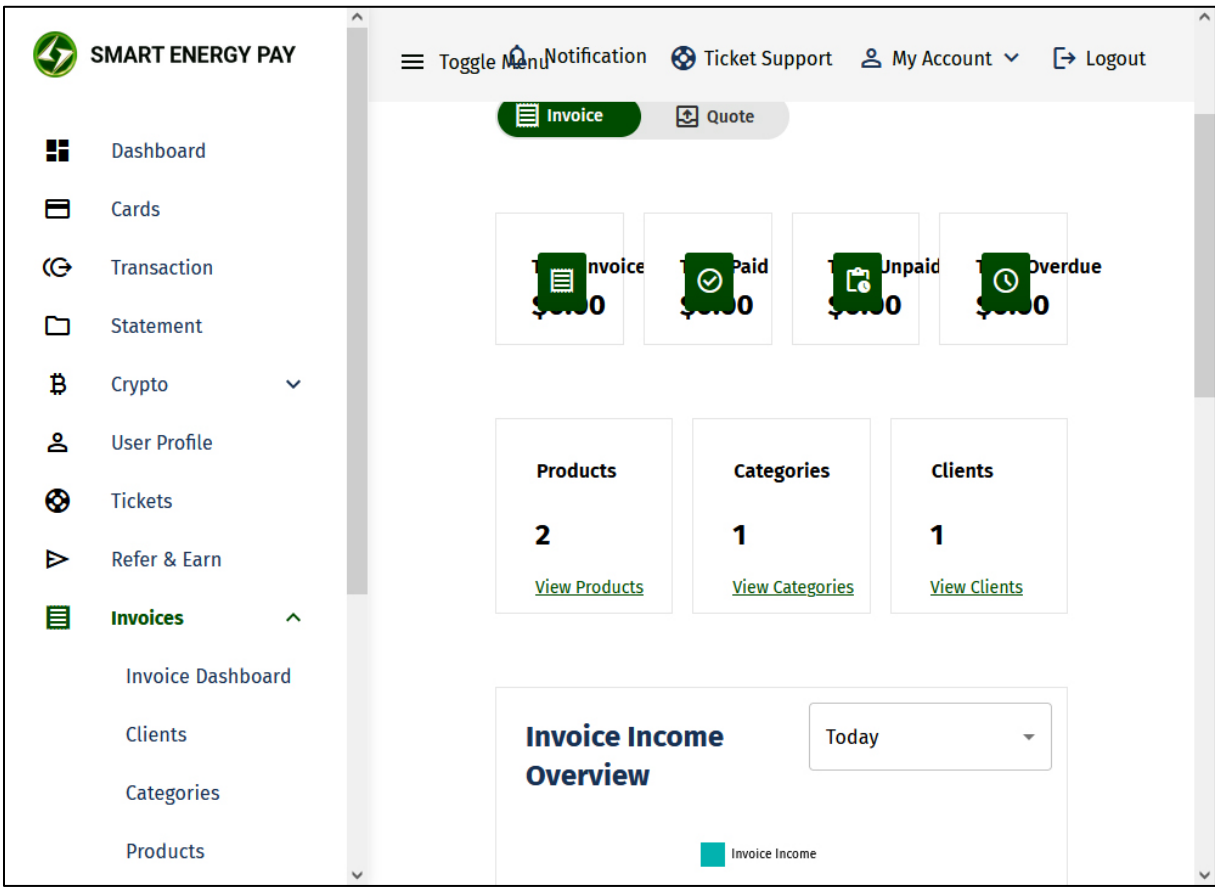

Overlapping
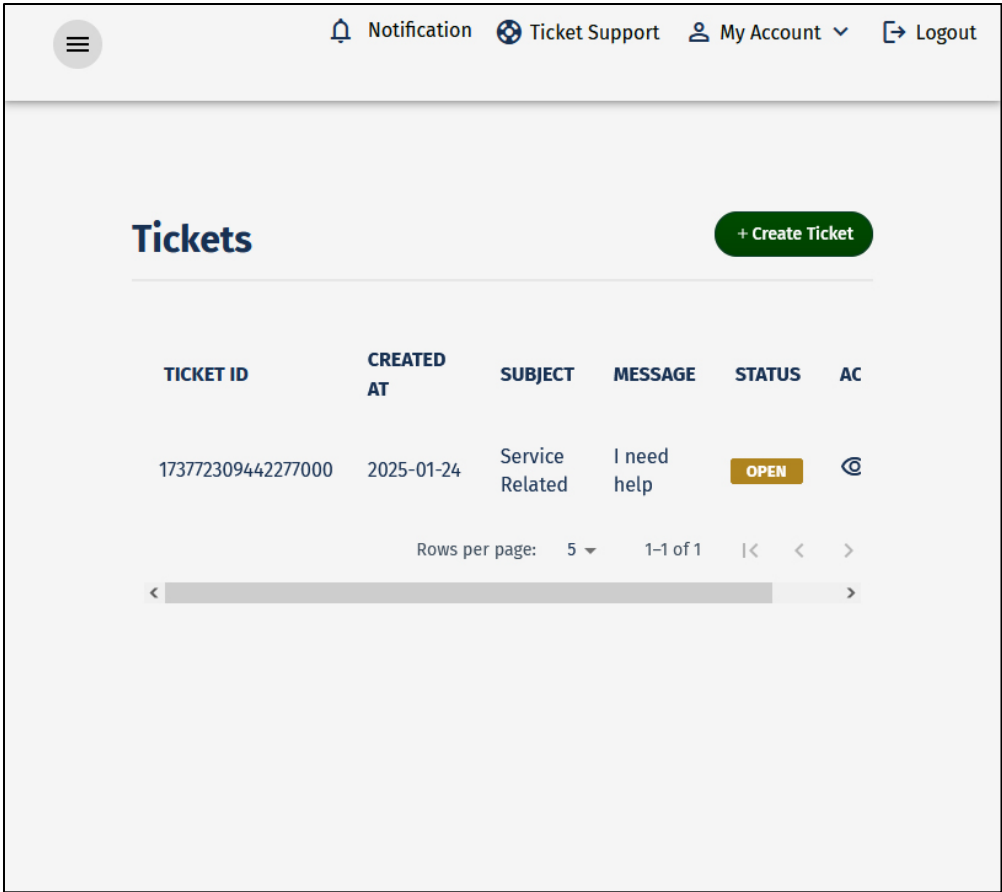

Hamburger menu is not clickable after resizing the browser image

After pressing f5 and clicking a menu item the overlay is still visible

Strange gray & whitebackground (see previous reviews)

Content is not positioned correctly anymore

You've written that it's optimized for 320x812... **not true**

You've written that it's optimized for 768x812… **not true**

You've written that it's optimized for 1024x812... **not true**

You've written that it's optimized for 1440x812... **not true** (fe. Overlapping Cards)

And much more….

<u>please please please please</u> take a good look at the previous reviews, compare the pages with the zeplin project, change the window size of your browser, test on your cell phone, tablet, computer, etc...
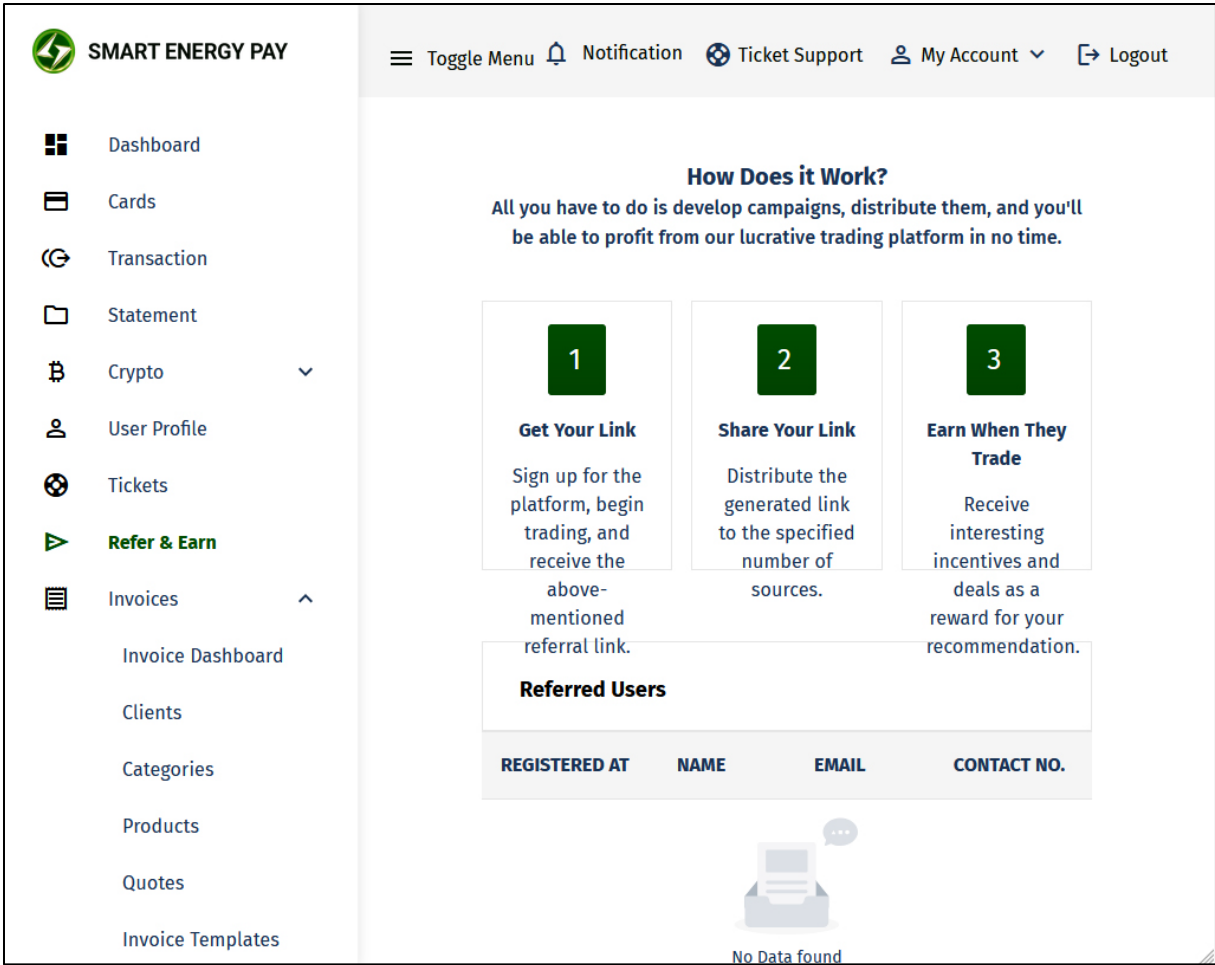

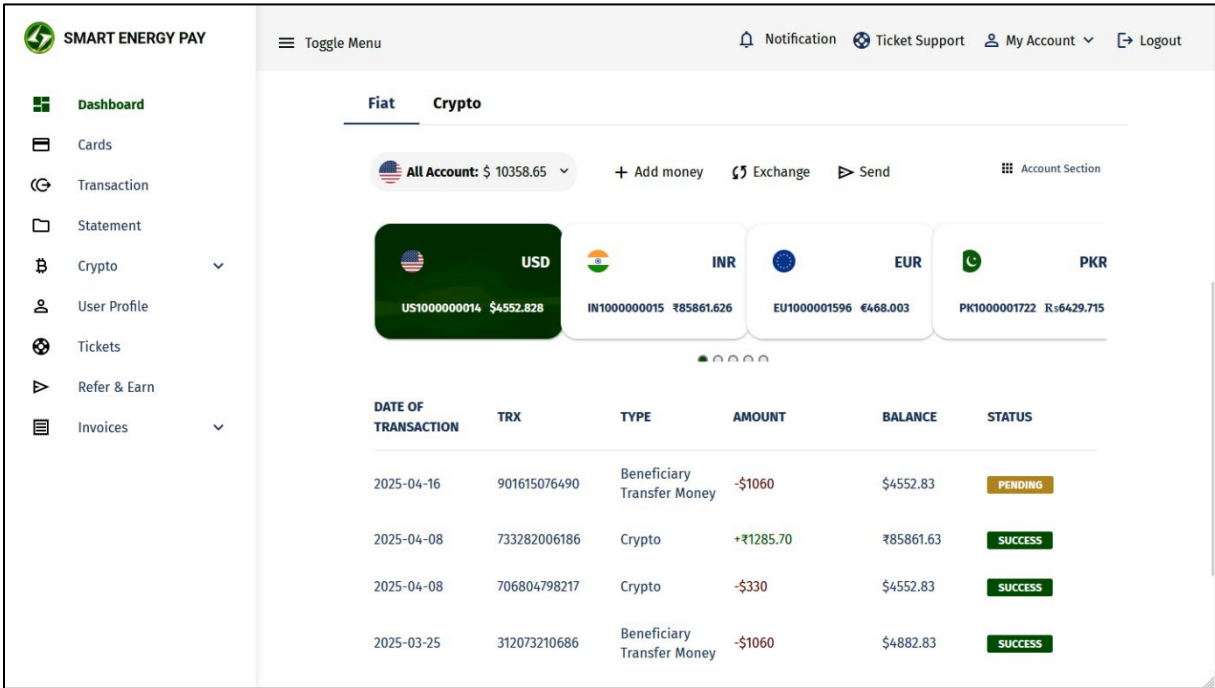

it is unacceptable that we are supposed to test the site and still see text overlays, orange buttons (fe https://smartenergypayment.com/settings tax), buttons without backgrounds or with box-shadow, wrong tabs, round boxes with double border, popups with wrong overlay, wrong font sizes and colors, etc.

if you want us to check the site, please do this yourself in advance... you would immediately notice that, for example, no e-mails are being sent OR the KYC process is broken (popup is only fired on dashboard page, no visible buttons) OR the red border on the dashboard is still there OR that here's an empty select https://smartenergypayment.com/spot OR that menu elements are not clickable OR that inputs (fe country selection in KYC process) are not completely clickable

<u>SO AGAIN:</u>

<u>please please please please</u> take a good look at the previous reviews, compare the pages with the zeplin project, change the window size of your browser, test on your cell phone, tablet, computer, etc... Thanks
